DeLP
Dynamic e-Learning Platform
for *Professional Development*

Reach more people and maximize your results with DeLP, the dynamic e-learning platform for online instruction. Learners gain skills and strategies to advance their professional development.

User-friendly course components

Course components such as self-paced videos and interactive exercises, a user dashboard, an online binder, and a resource center allow users to learn at their own pace and easily revisit course content.

Mini-games

Mini-games support learning through shorter game play. Include mini-games in a course or game-based program to help users practice a specific skill or strategy or check their knowledge.

Data collection and analysis

DeLP collects and analyzes user data, measuring user performance and progress to create useful feedback for users and valuable insights for your program.

3C's team of e-learning professionals will collaborate with you to adapt your content for e-learning and create a successful online course tailored to your learning objectives.

Each DeLP course includes direct instruction, illustrated examples, and opportunities to practice, all customized for the learning objectives and audience.

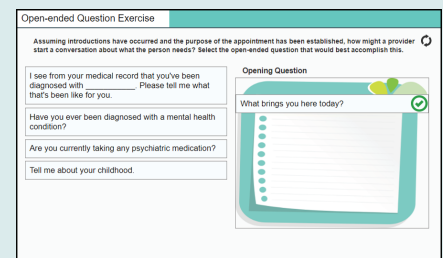

TELL ME.

A powerful mix of audio, video, and motion graphics to teach instructional content.

SHOW ME.

Animated or live-action demonstrations and role-plays to illustrate key concepts.

LET ME TRY.

Interactive exercises with personalized feedback to practice skills learned.
